EDUCATION

- Feroze Gandhi Institute of Engineering and Technology** Raebareli, India
Bachelor of Technology - Computer Science; GPA: 8.56 *August 2018 - July 2022*
Courses: Operating Systems, Data Structures, Analysis Of Algorithms, Networking, Databases

SKILLS SUMMARY

- Languages:** NodeJs, Java, JavaScript, SQL, MongoDB, MySQL
- Frameworks:** ExpressJs, ReactJs, NestJs
- Tools:** Docker, GIT, PostgreSQL, Git-Lab,
- Platforms:** Web, Mac, Windows,
- Soft Skills:** Leadership, Team Management, Ownership, Public Speaking, Time Management

EXPERIENCE

- Wits Innovation Lab** Office
Assistant Software Engineer (Full-time) *Jan 2023 - Present*
 - Development Tools/Languages:** : NodeJs, JSON, JavaScript, Restful APIs, Java, Postman.
 - RDBMSs and Database Management:** : MS-SQL, MongoDB
 - Operating Platform :** : Mac, Windows
- FYND** Remote
Full Stack Developer *Nov 2021 - Dec 2022*
 - Logistics Management System:** Created the project using ReactJs, NodeJs, and MongoDB.
 - Vulnerability and slowness fix:** Developed Restful APIs that refrain the vulnerability while performing the application.
 - Optimization and Functionality:** Developed both the Frontend and Backend of functionality in an effective and optimized way using NodeJs and ReactJs

PROJECTS

- BHARATHAM PROJECT :**
 - Utilized NodeJs, MongoDB for the Backend development, and React for the Frontend development.:
 - Implemented a Reconciliation Service Provider (RSP) for payment settlement in a micro-services architecture. :
 - Integrated RabbitMQ for communication between multiple services.:
 - Integrated the Bhasini translator for multi-language support.:
 - Contributed to building a robust Backend infrastructure supporting essential functionalities such as authentication and payment reconciliation .:
- ONDC HACKATHON:**
 - Implemented and managed inventory APIs utilizing NodeJs , and MongoDB.:
 - Developed features enabling sellers to register, add products, and track stock levels efficiently.:
 - Tracked metrics such as remaining stock, maximum stock, sales data, profit, and loss. Ensured seamless integration of inventory management functionalities for multiple sellers.:
- ONDC MOCK SERVER:**
 - Implemented a mock server in NodeJs using YAML for API mocking. Parsed YAML mock data with js-YAML for defining endpoints and responses.:
 - Facilitated efficient testing of API interactions :
- HR MANAGEMENT SYSTEM (HRMS) :**
 - Developed endpoints for employee, leave, attendance, payroll, performance, recruitment, training, and document management. :
 - Utilized Nest.js and PostgreSQL for efficient data handling and scalability.:
 - Designed robust authentication and authorization mechanisms for secure API access. :
- LOGISTICS:**
 - Developed a logistics management system using ReactJs, NodeJs, and MongoDB. Automated delivery agent assignment and real-time order tracking.:
 - Implemented secure authentication, error handling, and order cancellation features. :
 - Enhanced user experience with real-time notifications and optimized API endpoints. :

HONORS AND AWARDS

- JAVA certified by Udemy
- Full stack certification as a MERN Stack Developer
- Appreciation certificate from Wits Innovation Lab
- NodeJs certified course by Udemy
